New York City continues to be a global hub of culture, and nowhere is that energy and vitality as evident as in the city's vibrant art scene, which includes dozens of museums, hundreds of art galleries, countless nonprofit spaces and temporary venues, and a cornucopia of public art.

Contemporary art is in the DNA of this city, and it is where Pop Art, Minimalism, graffiti, digital art, and so many other influential styles and movements got their start, eventually going on to have a major impact on global culture.

To understand the real beauty of New York, look no further than its inclusiveness. There is something for everyone in this great metropolis. My suggestion is to go out and see it all!

Why not take a stroll in Central Park and check out the beautiful fountains, bridges, and public art projects throughout, or visit the commercial art galleries of Chelsea, Tribeca, or the Lower East Side to see some work by emerging and established artists on display? Or better yet, check out the wealth of museums the city has to offer.

Just Above Midtown: Changing Spaces

In 1974, Linda Goode Bryant founded Just Above Midtown (JAM), an alternative art space devoted to centering diverse work by Black artists and artists of color. The influential gallery and the now-iconic artists it supported — among them David Hammons and Lorraine O’Grady — are the subjects of this exhibition.
